# ABOUT

**MAXIMUM  
SIGNS**

## TAKING YOUR SIGNAGE TO THE **MAX**

Aluminum signs having any side 60cm or larger are made from .080 5052-H38 tempered aluminum with a minimum of 255 mpa. (mpa - modules of elasticity). A mill certificate is available upon request. Aluminum signs having both sides smaller than 60cm are made from .063 5052-H32 tempered aluminum. All aluminum is acid etched and allodined. Steel signs are made from 16 gauge galvanized or satin coat with a minimum weight of 2.656 lbs per sq. ft.

All materials used for the face of the signs are 3M products and a 3M Sign Fabricator Certificate is available confirming our current status as a qualified manufacturer. Engineer grade signs come with a 7 year warranty. High Intensity signs come with a 10 year warranty. Diamond grade signs come with a 12 year warranty. If requested, the year of manufacture and our company name is applied to each sign in order to reference the warranty period.

## 3M SCOTCHCAL ELECTROCUT - Graphic Film Series 7725

For Electronic Cutting, Thermal Transfer Printing and Screen Printing

3M 2mil vinyl series 7725 are pressure sensitive films designed for permanent electronically cut, screen printed or used in narrow width thermal transfer printing systems. These films, which are the same colour both sides, have a transparent synthetic liner that resists moisture absorption and static buildup, lays flat for easier assembly of multicolour graphics, and allows for superior cutting and weeding.
